

## Assignments

### Question-1

Write a Program to sort string of characters using Stack

### Question-2

Program for evaluation of postfix expression using Stack

### Question-3

Minimum flips to make all 1s in right and 0s in left

Input: str = "100101"

Output: 2

Explanation:

Flipping str[0] and str[4] modifies str = "000111". Therefore, the required output is 2.

Input: S = "00101001"

Output: 2

Explanation:

Flipping str[2] and str[4] modifies str = "000111". Therefore, the required output is 2.
